

QUALITY POLICY

Only the complete customer satisfaction and commitment to satisfy applicable requirements are able to guarantee growth and business development.

The Management assumes responsibility for the effectiveness of the quality management system, making available the human resources and the necessary infrastructures, communicating the importance of quality management, guiding and supporting staff to contribute to its effectiveness, promoting the use of the process approach and risk-based thinking.

The stringent requirements of the pharmaceutical and food industry make it necessary to guarantee a constant control of the level of cleanliness and hygiene, through an adequate risk assessment, in order to provide products that are safe for the end user.

The Management establishes new objectives for the improvement of all company processes, both in terms of service and production, from year to year. For the next three years the company will focus on the continuous improvement of efficiency and safety with a view to development.
